

**Effective
Office Solutions**
Automation & Technology

Effective Office Solutions (EOS) specialise in servicing, repairing, and maintaining Toshiba photocopiers and multi-function devices.

The service we provide allows small to medium businesses to operate in the most cost-effective manner, which is essential to their survival.

To meet the needs of hundreds of thousands of Australian small businesses, we solve the problem by installing vital office equipment without them spending top dollar to keep it functioning properly.

Our mission is to support office automation with multi-function printing and photocopying devices for young, growing business, by providing cost effective alternatives to equipment purchase. It's all about making workplaces easier, more efficient and less stressful.

There is a significant gap in the market for us which provides a great opportunity for YOU...

We are seeking Licensees to help grow the business through Territory allocation of Small Business Units(SBU's) into the QLD and VIC markets.

If you have the desire to own your own business – but have always been 'just a tech' – then we would love the opportunity to share our success with you.

Our comprehensive support services will allow you to keep doing what you love, enjoy the perks of running your own business, but leave the majority of the time-consuming and tedious administration to us!

We recognise our network is only as strong and successful as our technicians, so selecting the right people is important.

We are looking for a particular kind of individual. We are seeking technically-minded people with a natural curiosity and passion for fixing stuff, keenly aware with common sense and enjoy working with people and machines.

As an SBU owner, all you need to do is bring your skill in fixing things and your interest in copiers and printers. We'll provide you with all the other skills, systems and processes that will help make your business successful.

If you think you have what we're looking for, we would love to hear from you!
